

Timeline check-in

Alyssa Hagele, Abby Malech, Henderson Vo

2026-05-22

Ideas for analysis and background

should include some citations (not all) should include ideas for analyses to answer questions and some preliminary code to run those analyses

Visualizations directly relevant to answering questions

Other exploratory visualizations

Plan for elective

should include some description/image of drafts

should include plan for making progress in the next two weeks

- Final product: trifold brochure made on canva showing mostly (5) native species of focus in the grassland habitat + two non native species
- Would possibly replace online images of plant species with our own if we have the time to go to NCOS and I.D. plants

Plan

- Week 8 → finish gathering information on key species + 2 non native key species
- Week 9 → finish trifold design
- Week 10 → possibly present *or* finalize details to present during finals week
